*Valley View*

Bighorn sheep

Bronze, 15.5 x 13 x 7

*A bighorn ram is truly a magnificent animal and occasionally, on my treks into Montana back country, I am fortunate to observe them. In sculpting "Valley View," I sought to capture the massiveness as well as the elegance of these sure-footed creatures. I also wanted to incorporate the element of height*

*and loftiness. This was accomplished by placing the ram on steep angled rocks. By placing these angled rocks parallel to the body of the sheep, it creates a pleasing design and composition.*
